

CHEMSHIELD WINGTIP SCREWS

Fixing timber to steel has never been so easy

One step application

Self Drilling / self countersinking

Save Time and Money

No special skills or tools required

Chemshield finish for long life

Self drilling hardened drill point, designed to drill through metal up to 3.0mm thick

Patented Wing tips quickly clear a pilot hole through top timber to leave the thread clear

Unique self embedding countersunk flat head with 8 nibs designed to sit flush in timber

Less torque to self embed than conventional CSK head screws

Chemshield provides greater protection in ACQ treated timber

Brown colour designed to blend with timber

No. 2 Square drive for high torque application

Ideal for ; Hardwood and Treated Pine Decking, Pickets, Slats, Flooring, General timber to metal applications

ChemShield
