FREQUENTLY ASKED QUESTIONS

Is FireCrunch easy to handle?

YES! FireCrunch is made using magnesium oxide components that are both lightweight and easier to fix than regular plasterboard.

Do i need special tool to cut FireCrunch?

NO, FireCrunch is a versatile, easy to use material that can be cut and shaped using standard tools that tradies would already have. No special diamond cutting tools required. Plaster setters can line cut and snap 10mm sheeting.

Is FireCrunch bad for the environment?

NO, FireCrunch is produced with MgO components which are 45% waste from steel production and are sustainably reusing old materials in order to create new ones. The MgO used also does not harm the environment after disposal and is 100% recyclable.

Will FireCrunch reduce installation costs?

Yes, FireCrunch reduces three layers of 13mm plaster board to one 10mm FRL 90/90/90 FireCrunch cuts costs up to 70% labour and materials.
